

MARKO CINDRIĆ

X. Trokut 7, Zagreb, Croatia
+385 95 7489 656
marko.cindric35@gmail.com

Profile

First-year graduate student in Mathematical Statistics at the Faculty of Science, University of Zagreb. Interested in mathematical modeling of engineering problems, computer simulations, machine learning and optimization.

Education

University of Zagreb, Faculty of Electrical Engineering and Computing (FER)

Computer Science – Bachelor of Engineering (bacc. ing. comp.),
Summa cum laude, cumulative GPA: 5.00 September 2022. – September 2025.

University of Zagreb, Faculty of Science (PMF)

Mathematical Statistics – Graduate Study Program September 2025. – Present

Digital Skills

Programming Languages: C/C++, Java, Python, JavaScript, CUDA

Tools & Platforms: Git, Linux

Other Technologies: HTML, CSS, SQL, Microsoft Office, LaTeX

Language Skills

English – Fluent

Croatian – Native

German – Good working proficiency

Teaching Assistant at FER

- | | |
|-------------------------------|--------------------------------|
| • Introduction to Programming | October 2023. – February 2024. |
| • Mathematical Analysis 1 | October 2023. – February 2024. |
| • Mathematical Analysis 2 | March 2024. – July 2024. |
| • Object-Oriented Programming | March 2024. – July 2024. |
| • Probability and Statistics | October 2024. – February 2025. |

Assisted in conducting laboratory exercises, explaining course material and mentoring junior students.

Projects

"Proximal Splitting Method for Covariance-Modulated Optimal Transport", Bachelor Thesis 2025

Application of the Douglas-Rachford algorithm for solving dynamic optimal transport and covariance-modulated optimal transport problems. Implemented the algorithm in C++ and evaluated its performance.

Development of a Compiler for a Simplified C Language October 2024. – February 2025.

Development of a compiler for a simplified version of the C programming language in C++ as part of the Programming Language Translation course. Independently implemented lexical, syntactic and semantic analysis, as well as machine code generation.

Competitions and Awards

- First place at the AI BattleGround Hackathon (2026.)
- Two FER awards "Priznanje Josip Lončar" for outstanding academic achievement during individual study years (2023., 2024.)
- "Posebno priznanje Josip Lončar" for the best overall performance throughout the undergraduate study program (2025.)
- Valedictorian of the First Gymnasium Zagreb
- National Competition in Fundamentals of Informatics – participant (2020., 2021., 2022.)
- National Mathematics Competition – third prize (2022.)
